## SUMMARY

Career-transitioning cybersecurity professional with nearly 3 years of hands-on ISP field experience at Allo Fiber — including Central Office access, fiber optic infrastructure, VoIP, POTS, and IPTV over IP. Holds two Google Cybersecurity credentials (2023 & 2024). Maintains a personal home lab running TrueNAS and containerized services. Actively pursuing CompTIA Security+. Seeking a Tier 1 SOC Analyst role.

## EXPERIENCE

**Independent Contractor (Gig Work)** — *DoorDash* 2025 – Present

- Maintained income following a layoff while actively pursuing a cybersecurity career transition — studying for CompTIA Security+ and building home lab skills

**Residential Installation Technician** — *Allo Fiber* 2022 – 2025

- Installed and troubleshot fiber optic internet, POTS, VoIP, and IPTV systems for residential customers; worked inside the Central Office with core ISP switching and routing infrastructure
- Hands-on with ONT devices, fiber cabling, routers, VoIP/IP phone adapters, and IPTV set-top boxes; built direct familiarity with multicast traffic, SIP, DHCP, and QoS in a live ISP environment
- Diagnosed signal integrity issues and network faults using systematic root-cause analysis; consistently met SLA targets while managing a full independent dispatch schedule

## PROJECTS

**Home Lab — TrueNAS + Containerized Services** — *Personal* Ongoing

- Self-hosted lab running TrueNAS with containerized services; hands-on management of storage pools, permissions, container networking, and system logs in a live environment

**Network Traffic Analysis with Wireshark** — *Google Cybersecurity Certificate Lab* 2023

- Captured live traffic, established baselines, and identified port scan, ARP poisoning, and DNS abuse signatures in the format expected of a Tier 1 SOC analyst

## CERTIFICATIONS & EDUCATION

**Google Cybersecurity Certificate** — Coursera / Google | Sept. 2023

- Courses: Foundations of Cybersecurity · Play It Safe: Manage Security Risks · Connect and Protect: Networks and Network Security · Tools of the Trade: Linux and SQL · Assets, Threats, and Vulnerabilities · Sound the Alarm: Detection and Response · Automate Cybersecurity Tasks with Python · Put It to Work: Prepare for Cybersecurity Jobs

**Google Cybersecurity Specialization (2nd credential)** — Coursera / Google | May 2024

**CompTIA Security+** — In Progress | JavaScript (High School CS, 1 yr) | High School Diploma

## TECHNICAL SKILLS

**Networking:** Fiber optic, ONT devices, POTS, VoIP/SIP, IPTV/multicast, TCP/IP, DNS, DHCP, QoS, router config, Central Office equipment
**Security:** SIEM (Splunk, Chronicle), incident response, network traffic analysis, NIST, OWASP, alert triage, Wireshark
**Systems:** Linux CLI, TrueNAS, Docker/containers, Python basics, JavaScript, SQL, Windows
